ABOUT

I am a Computer Science student seeking to expand my experience in data analysis, data processing, and process automation. I continuously develop my knowledge in IT and related fields. I am characterized by meticulousness, openness to collaboration, and a strong desire to improve both my technical and communication skills.

TECHNICAL SKILLS

- **Microsoft Excel (Advanced)** – Power Query, Power Pivot, DAX, Pivot Tables, Advanced Formulas, Macros
- **MS Power BI** – Data modeling, Power Query, DAX, interactive dashboards and reports
- **MSSQL Server** – SQL queries, database management (SSMS), T-SQL
- **MySQL** – SQL queries, data analysis, query optimization, performance monitoring
- **MySQL Workbench** – Database management
- **Python** – Data analysis (Pandas), visualization (Matplotlib, Seaborn), EDA, data cleaning and aggregation
- **Jupyter Notebook** – Data analysis environment
- **n8n** – Business process automation, workflow design and optimization, system integrations, webhooks, API
- **JavaScript** – Scripts for process automation and system integration
- **Google Cloud** – Using cloud services for automation and integration (API, workflow, data processing)
- **Microsoft Office** – Advanced knowledge (Word, PowerPoint, Outlook, etc.)
- **Visual Studio Code** – Work environment setup, extensions
- **Asana** – Task and project management
- **Website Maintenance** – Error diagnostics, CMS updates (core, plugins, themes), performance and security optimization

INTERESTS

Interest in new developments in the computer hardware market, following product launches and reviews of new components, assembling and optimizing PCs, recreational cycling, long walks and strolls, interest in new technologies and AI
